Amandine Revol
Senior UX Designer

Work Experience

Senior UX Designer, JobCloud (job portal)
June 2023 - present, Zurich Switzerland
- Collaborating with designers, product managers, and engineering teams across multiple locations to provide innovative solutions that seamlessly integrate across the product.
- Identify areas for improvement and opportunities that support business objectives. Sharing the findings with my scrum team to influence the scope of work.
- Design a modern and innovative mobile and web interface that meets current design standards and business needs, while keeping the brand's style consistent.
- Responsible for the design system, ensure that design is consistent and of high quality, prfioritize changes & collaboration with development team.

UX Designer, Levuro (social medial publishing tool)
January 2021 - May 2023, Zurich Switzerland
- Designed, in close collaboration with developers, a livestream editing and publishing tool delivered in under 3 months; used during the FIFAe World Cup and adopted by teams in 16+ countries for real-time social media publishing.
- Created and maintained Levuro's design system, ensuring consistent branding and UI patterns across all digital products.
- Led the end-to-end design process: from problem definition and user research to final UI delivery, ensuring stakeholder alignment at every stage.
- Launched and managed a Beta User Program to gather continuous feedback, resulting in faster iteration cycles and measurable product improvements across web and mobile platforms.
